

## Are you involved in the planning, design, procurement or delivery of offsite and other modern methods of construction in Ireland?

The Irish government has committed to enabling a more efficient and sustainable approach to building design, construction and operation. Under the ambitious National Development Plan and the National Planning Framework, MMC has a vital role to play. It is particularly important for the post-pandemic recovery of our built environment, economy and communities. To ensure successful navigation of these ambitions, Evulusion Innovation and C+W O'Brien Architects are seeking to bring together organisations and professionals to form a representative body for designers, manufacturers and installers of Modern Methods of Construction in Ireland.

The overarching objectives of the body are to develop and promote Ireland's MMC sector, nationally and internationally, in order to:

# 1

### **BUILD KNOWLEDGE AND AWARENESS OF MMC THROUGH:**

- Sector networking - Industry events
- Sharing case studies and seeking to understand obstacles to adoption
- Collating, maintaining and sharing sectoral knowledge
- Provide continual professional development to members and industry
- Collaborate with other similar bodies / organisations to increase knowledge and awareness of MMC.

# 2

### **PROMOTE A REGULATORY ENVIRONMENT ADDRESSING TESTING, CERTIFICATION AND QUALITY THROUGH:**

- A shared voice for promoting policy change and development
- Dissemination of industry knowledge and experience
- Actively engaging with Governmental and Sectoral bodies, work groups / task forces
- Engaging with MMC bodies / organisations outside of Ireland

# 3

### **SUPPORT AND FOSTER ACCESS TO THE MMC MARKET THROUGH:**

- Engagement with Enterprise Ireland and other funding bodies
- Engagement with Public and Private procurement bodies / agencies to develop greater efficiencies in procurement policies
- Develop and strengthen supply chain capacity
- Engagement with professional organisations to promote a DfMA philosophy at the design stage of projects.

# 4

### **ADVOCATE ON BEHALF OF THE MMC INDUSTRY THROUGH:**

- Lobbying of policymakers
- Offer professional advice
- Public voice for members
- Promotion of sectors at industry events

MMC Ireland will be a collaboration of industry talent and experience, working in partnership to gather insights and ensure these insights feed into relevant policymaking. Input is sought across the seven categories of MMC, namely: volumetric modular, structural panellised, offsite components, additive manufacture, non-structural assemblies and sub-assemblies, offsite building material improvements and onsite process improvement.

Annual fees: €4,500 per organisation

Contact the MMC Ireland team at [info@mmcireland.ie](mailto:info@mmcireland.ie) with any queries and register to join us for the inaugural meeting on **Monday 16<sup>th</sup> May 2022, 4pm.**
